Admin: Eduardo

1. System admin logs in and is able to see statics for the website such as number of users, type of users a long with the number of such users, see banned users, and the number of properties listed on the site.

2. Admin views that C1 has commented something inappropriate in the reviews section, C1 gets banned and their account is deleted by the admin.
3. Admin returns to the admin landing page to see that C1 has been removed.
4. C1 tries to use the website again but instead has to make a new profile, C1's previous account has a been deleted.
